**Observatoire de Paris - PSL Centre de recherche en astronomie et  
astrophysique**

---

**The Paris Observatory Library keeps historical collections from the Observatory and provides documentation and services to researchers.**

**Search all the catalogues of the Library Catalog of printed books and journals Electronic resources Alidade (archival collections) Cosmos (museum collections) Digital library**

**PSL resources**

It is one of the most beautiful astronomical-astrophysical libraries in the world with a service entirely devoted to research. Its two core missions aims to provide researchers with the most complete and relevant documentation, to preserve and to enhance a 350-year-old heritage which still expands today.

Although the library is mainly devoted to scientists at the Observatory, it is also accessible to the wider public : researchers from different fields of study, as well international researchers, students, school children and the general public are welcome and can attend its cultural and scientific events.
